

PASSION for PROGRESS

## Digitization in the training sector

Learning, knowledge transfer, tips and tricks available when and where you want.

Our e-learnings are available for 180 days by default. You decide for yourself when and how often you want to edit the modules. Furthermore you can book the modules individually or in a package.

Please contact us!

## Digital learning

This is also becoming increasingly important for us and it is impossible to do without it in our everyday learning, not least because of the recent pandemic situation.

In order to cater better to your wishes and needs, we offer a large part of our knowledge digitally in various formats. We make a basic distinction between online training (online with an instructor) and e-learning (self-directed learning without an instructor).

Currently, we offer excerpts from our compact theory training for equipment operators, mechanics and service staff. The most important topics – safety, operation, technical knowledge – have been compiled in corresponding e-learning units in a clear and comprehensive manner.

## Your advantages

- Compact knowledge transfer
- No travel expenses
- Time/location independent

We have divided the topics into different packages. You have the option to book the complete package or you can put together the individual modules for yourself. Talk to us, we will be happy to support you in the selection.

### Package I: OPERATOR TRAINING OT-BG

Based on our reinforced theory training for equipment operators of Bauer rotary drilling rigs, we have developed the topics in module units as e-learnings.

#### Module: EQUIPMENT

Undercarriage System  
Undercarriage with Oscillator  
KDK Systems

#### Module: SAFETY

Stability  
Working Planum  
Safety for Operators – Rope Technology

#### Module: EQUIPMENT TECHNOLOGY

Safety of Equipment – Safety Switches  
Safety for Operators – Hydraulics

### Package II: ASSISTANCE SYSTEMS

Equipment operators, mechanics and service staff receive background information and instructions for the operation of the current assistance systems, installed in the rotary drilling rigs of Bauer Maschinen GmbH

**Module 1:** One-directional Spoil Discharge Assistant

**Module 2:** Bi-directional Spoil Discharge Assistant

**Module 3:** Crowd Plus

**Module 4:** Casing Assistant

**Module 5:** Automatic Mast Alignment

With our knowledge and competence, we are happy to support you in the creation of product-specific briefings/trainings oriented towards target groups. Based on a tablet application, we are also pleased to create completely individualized learning applications for you, which can be run on the common operating systems (iOS, Windows or Android).
